

NOAA Fisheries near-real time ocean bottom temperatures collected between May 31 and August 16, 2021 during the Eastern Bering Sea (May 31 - July 22) and Northern Bering Sea (July 22 - August 16) surveys aboard the F/V *Vesteraalen* and F/V *Alaska Knight*. On August 16, 5 stations with station IDs of S-21 (near 61°N and -170.804°W, measuring >3.5–4°C), R-21 (near 60.667°N and -170.748°W, measuring >3.5–4°C), R-20 (near 60.667°N and -170.063°W, measuring >4.5–5°C), R-19 (near 60.667°N and -169.378°W, measuring >7.5–8°C), and R-18 (near 60.667°N and -168.693°W, measuring >7.5–8°C), S-19 (near 61°N and -169.421°W, measuring >7.5–8°C), S-19 (near 61°N and -168.729°W, measuring >8°C), were surveyed by the F/V *Vesteraalen*. There are 0 stations planned for August 17. These data have been through final review. Final, validated survey data (e.g., temperature and species collected at each station among other observations), are publicly accessible on the Fisheries One Stop Shop platform (FOSS; https://www.fisheries.noaa.gov/foss/f?p=215:200:1899488600966:Mail:NO:::). *Credit: NOAA Fisheries*
